Orange Healthcare

objectives: for joining up healthcare

- modernize the healthcare infrastructure and equip healthcare facilities with communications solutions
- connected medicine for management of healthcare information
- expertise in communications to enable healthcare professionals to increase patient comfort and peace of mind

Developing healthcare ICT solutions in 3 areas

Services for professionals

Professionalsto-professionals

Infrastructure for coordination, collaboration, and information flow

Sharing of medical images

Remote monitoring

Professionalsto-patients

Patients keep in touch with healthcare professionals

Remote cardiac monitoring

Preventive services

Patient

improve prevention by self-management

Drug authentication

Working with recognized leaders

Manufacturers

Professionals

Elite schools

International Alliances

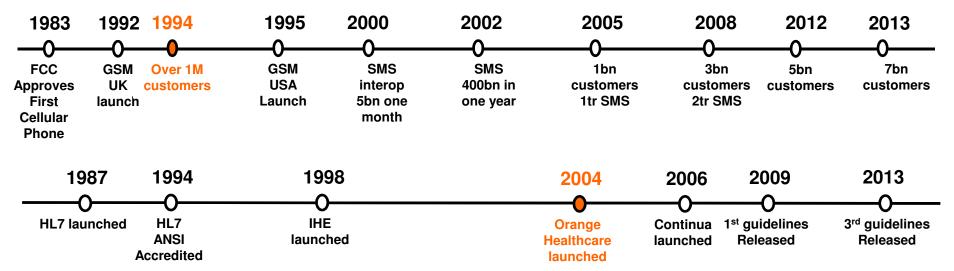

Growth of Health & GSM

GSM Association founded in same year as HL7 (1987)

3GPP launched in same year as IHE (1998)

Similar start dates – different adoption rates

78 78

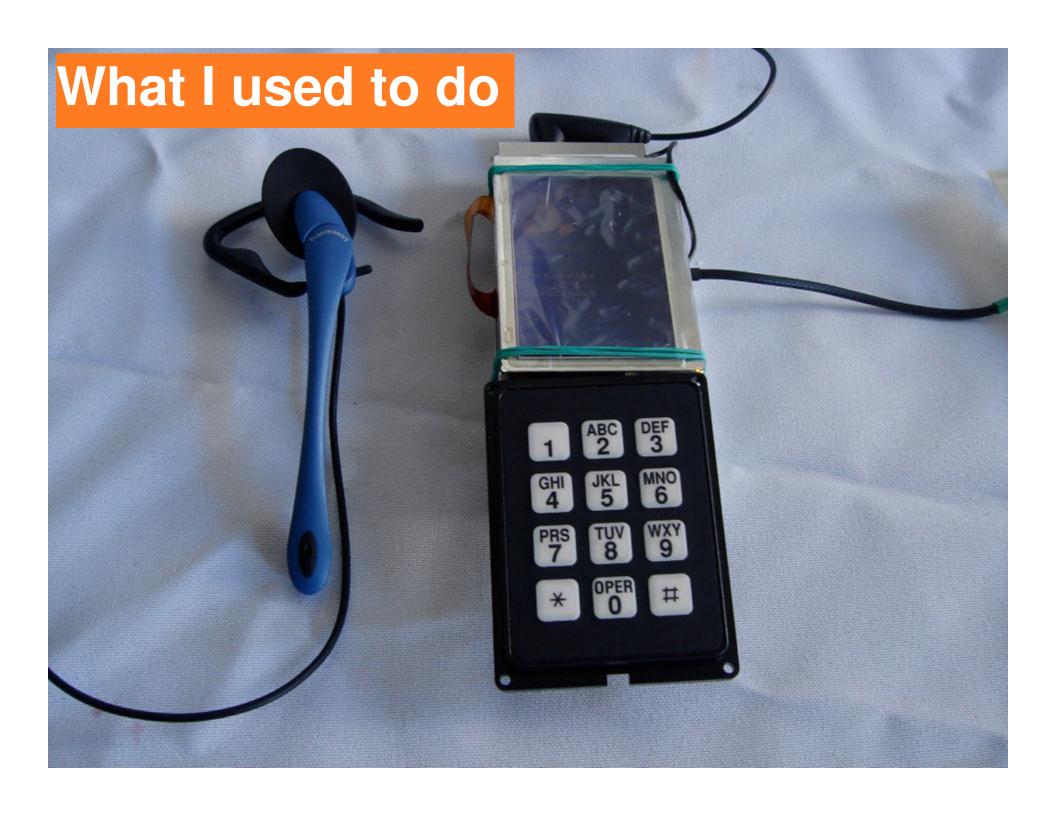

Some Perspective: Early days easily forgotten...

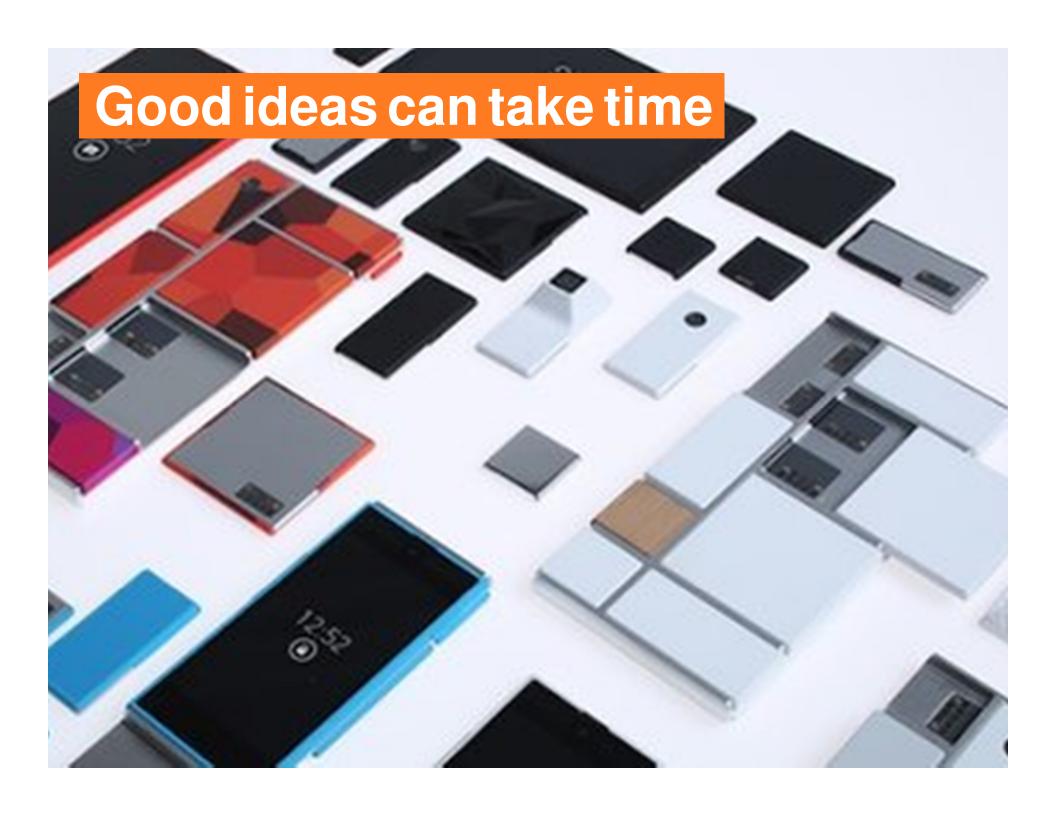

Remember?

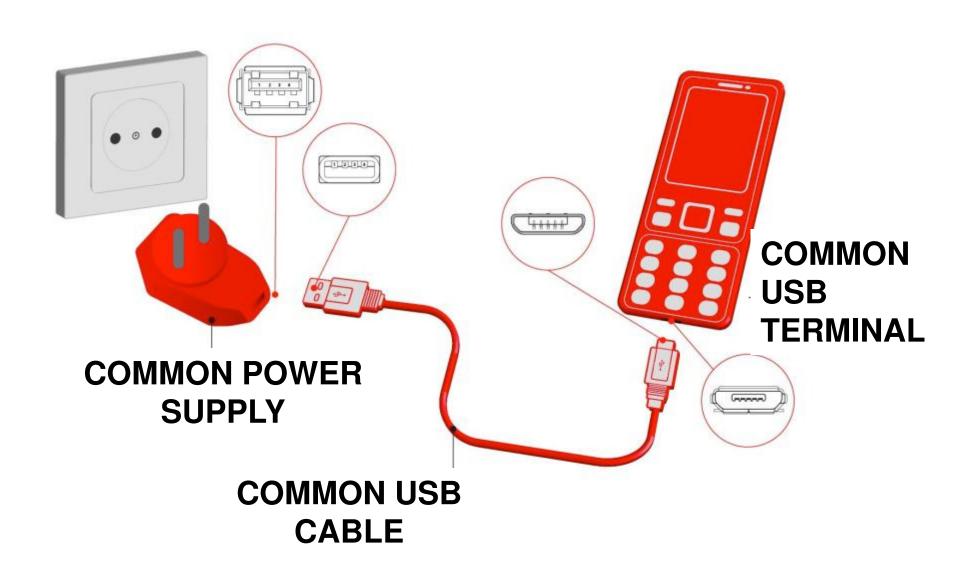

1982: A phone for \$4,000 for just a few voice calls?

Unable to contact friends on Voda when you were Cellnet

Adopting a common (sense) standard

There are (too) many standards to choose from:

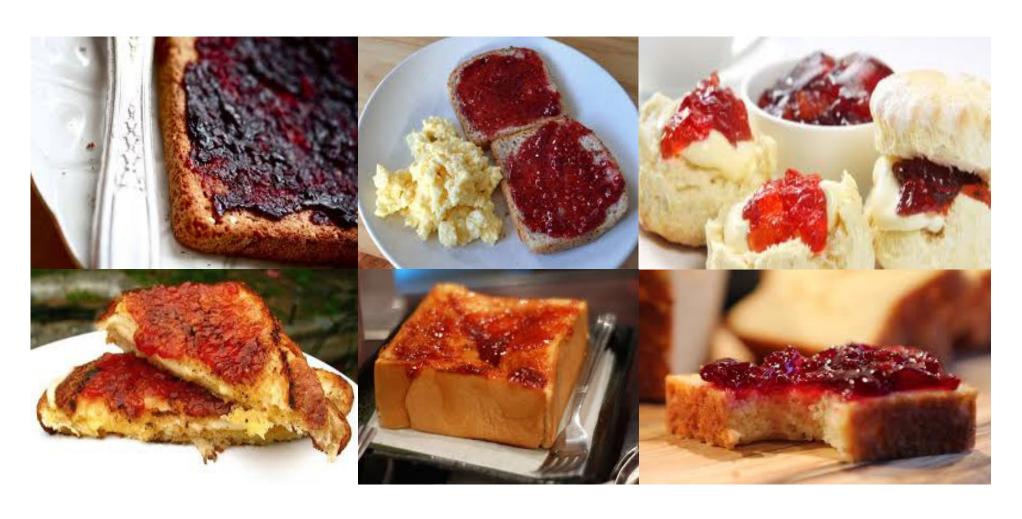

Variations on a theme with many interpretations

Everyone agrees on the need for 'them'

...but the lack of 'them' is often cited as a barrier

Many ways to implement

Everyone has their personal favourite

Perception

The way in which something is regarded, understood, or interpreted

What people think standards people do

Corporate tourists

In reality meanwhile

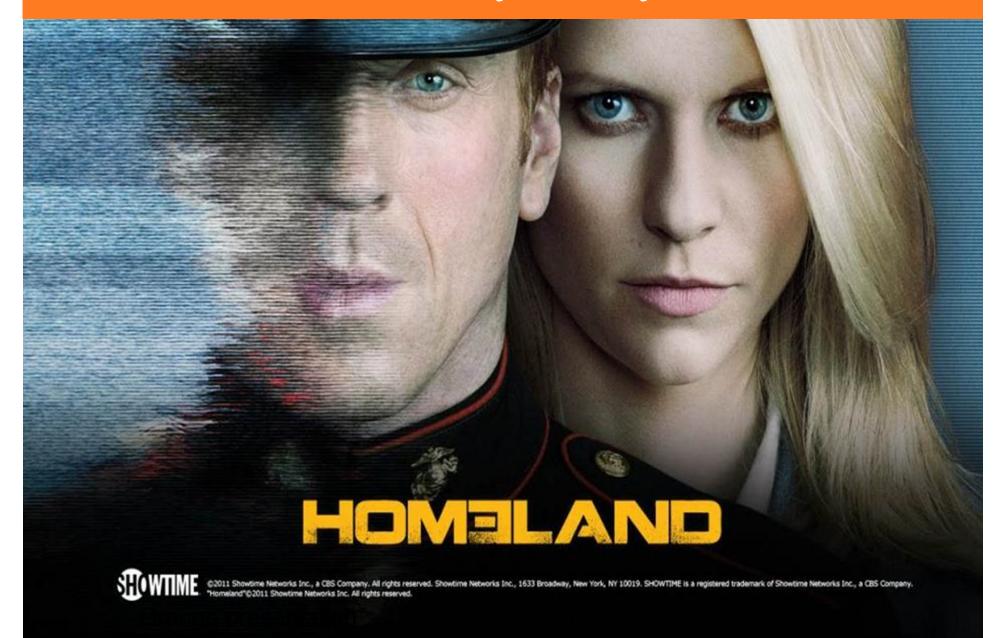

Challenge

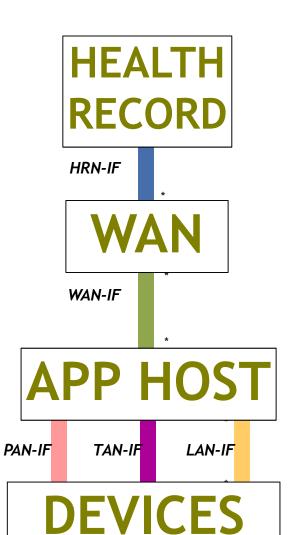

a call to prove or justify something

Security is Key

Common Interfaces in Continua

TLS v1.0
IHE XDM (S/MIME)
IHE XUA, IHE XUA++
IHE PIX
IG for HL7 CDA R2 Consent Directive
IHE Document Encryption (DEN) Profile
IHE ATNA

Confidentiality, Integrity and Authentication Confidentiality, Integrity and Authentication Entity authentication Identity management Consent Management Consent Enforcement Auditing

WS-I BSP (TLS v1.0)
WS-I BSP (WS-Security + SAML 2.0)
IG for HL7 CDA R2 Consent Directive
XML Encryption Specification
IHE ATNA
OAuth v2.0

Confidentiality, Integrity, authentication Entity authentication Consent Management Consent Enforcement Auditing Authorization

Zigbee security

Confidentiality, Integrity and Authentication

Bluetooth security

Confidentiality, Integrity and Authentication

NFC security

Confidentiality, Integrity and Authentication

Guidelines - Certification - Recognizable Logo

Guidelines strict interoperability

SOFTWARE

Certification and Logo

recognizable - promise of interoperability with other certified products

PACKAGING

APPLICATIONS

SUBSTRATES

Certified devices (>90 in total)

Breaking Down Interoperability Barriers

INCREMENTALLY
