  - Structure. Content Committee

Environment

Diagram:

Arrow on left labeled "convergence" (pointing up)

- **UNIVERSAL**: IHTSDO
- **NATIONAL** (1): MSSSI — (2) NRC2
- **REGIONAL**: SACYL — (3) SES — RRC1 — RRC2
- **LOCAL**: ÁVILA — BURGOS (4) — LCR1 — LCR1 — LCR2

Hierarchy:
- IHTSDO → MSSSI, NRC2
- MSSSI → SACYL, SES
- NRC2 → RRC1, RRC2
- SACYL → ÁVILA, BURGOS
- RRC1 → LCR1
- RRC2 → LCR1, LCR2

(1) MSSSI (Ministerio de Sanidad, Servicios Sociales e Igualdad. Gobierno de España)
(2) NRC (National Reference Centre)
(3) RRC (Regional Reference Centre)
(4) LRC (Local Reference Centre)

PURPOSE

Promote the use of standards in Clinical Information Systems

Centralization of terminological resources in a Regional Health Service

Common Methodology procedures related to clinical terminology

Benefits

Using standards ➡ Semantic interoperability

Centralized terminology resources ➡ Integrated, synchronized and updated Terminology resources

Common methodology in proceedings related to Clinical Terminology ➡ Terminology resources quality

Reuse and analysis of healthcare information

Clinical Terminology Governance - Approach

Terminologies in use today → Map standardized terminology
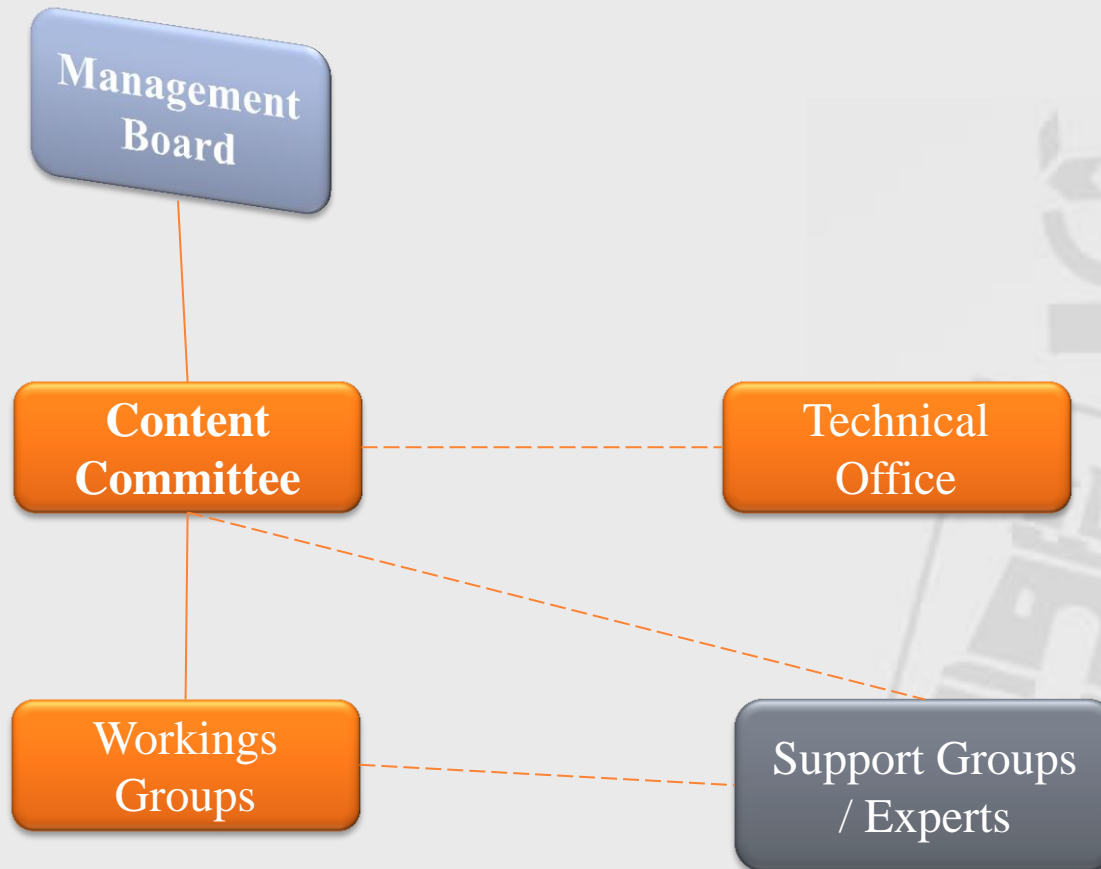

Decentralized Terminological resources → Clinical Terminology Server

Lack of uniformity in proceedings → Clinical Terminology Governance Terminology proceedings Map

Structure

Management Board

Content Committee

Technical Office

Workings Groups
