EXPAND

Expanding Health Data Interoperability Service

Expanding Health Data Interoperability Services

Aims to support the moving from point-solution pilots to large-scale deployment of eHealth cross border services.

Working on existing assets to have large-scale deployment of cross-border care facilities.

- Supporting the CEF subgroup of MS
  - Business Case for CEF 2015
  - Assets register for future priorities
- Facilitating Handover of Assets to CEF
- Creating the means to maintain and expand
 already existing resources
  - maintenance workshops

EXPAND
("Bridge to CEF")

eHealth assets
from
different projects

CEF
(available for
"mature" domains;
with specs which
may be
used in procurement)

EXPAND

UC Priorities for Asset Selection

- **CEF 2015:** Assets to be maintained and prepared by EXPAND for hand over to CEF
  - ❖ Patient summary, chronic diseases, continuity of care
  - ❖ E-Prescription
  - ❖ Patient Registries
  - ❖ Reference Networks
- **WIDER CROSS BORDER USE CASES:** Assets to be assessed and signposted as future extensions of CEF priorities.
  - ❖ Medical imaging information sharing
  - ❖ Hospital diagnostic imaging workflow
  - ❖ Laboratory information sharing
  - ❖ Hospital laboratory workflow
  - ❖ Tele-monitoring of chronic diseases (hospital / home), telemedicine services
  - ❖ Integrated neonatal care
  - ❖ Well-being management information shared within EHRs

EXPAND

Antilope handover Objective 1/3

- Consolidation is needed

- Support CEF subgroup of MS concerning the identification and prioritization of a use cases and a roadmap for their implementation in CEF (and beyond)

EXPAND

Business modeling

✓ limited to the two CEF eHealth priorities for 2015

✓ short term sustainability through CEF funding and national level investment,

- Existing assets (incl. Antilope assets)
  - Adoption status of each asset
- Core and generic services
  - Assets utilization

Discussed in November 2014

✓ List of Assets for CEF 2015

✓ Providing clarity in support of preparation of calls

- described the eHealth business use case for CEF 2015 priorities

- described the "infrastructure" to support the business use cases

✓ a pilot version of the asset register

EXPAND

Antilope handover Objective 2/3

- Support the process of hand over to CEF including through supporting the CEF procurements e.g. by adding clarity to needed key documentation inherited by epSOS

- Handover to Value Health to continue with the business modeling and sustainability models beyond CEF.
